Dear John,

I would like to extend my thanks to you on behalf of the Technology Policy and Information Security team here at Pfizer for the engaging presentation made at the 2007 Information Security Officer Conference held in Miami, Florida. Your professionalism and knowledge was apparent in both our interactions regarding logistics as well as during your talk.

"Identity Theft Jujitsu" was indeed the perfect fit for the opening of our conference thanks to its blend of applicability to our subject matter, your eloquent delivery and inclusion of physical movement. Our participants were engaged and motivated to take lessons learned and apply them both in their personal lives as well as to their work. I received much positive feedback summarized below by the High rating of your presentation via a post meeting survey.

*"Please rate each of the sessions you attended on a scale of 1-10. 1 being the lowest and 10 being the highest:
Keynote: Identity Theft Jujitsu (John Sileo)"*

Overall the conference was a success with approximately 200 participants representing 21 countries and nearly every division at our company. Your speech helped to provide a broader view of a growing issue faced by many people and companies worldwide. The simple, common sense approach for avoiding and remediation exposure was well developed and easy to remember. In fact, it was harped upon a few times throughout the course of the 3 day meeting.

I would indeed recommend this presentation to others in my field as well as consider your services again at future conferences. I would like to express again my sincere thanks for your quality work and contribution to the 2007 Information Security Officer Conference.
